01

Products and Solutions

Cybex provides business partners with the products and solutions that will accelerate their time for value and growth.

Products and Solutions

Decentralized Financial Infrastructure Solution

WHAT MAKES CYBEX

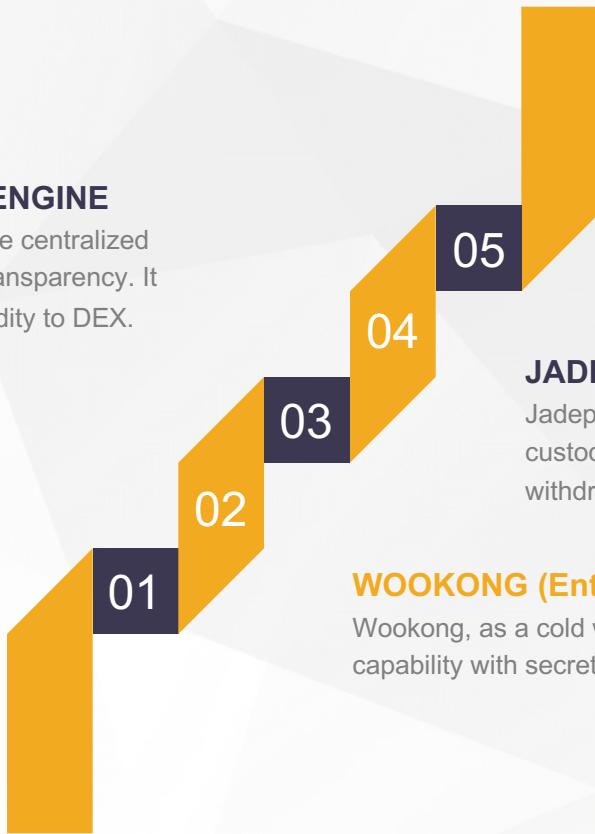

DIFFERENT?

REALTIME ORDER MATCHING ENGINE

ROME gets order matched in real time like centralized exchanges without sacrificing on-chain transparency. It facilitates Market Markers to provide liquidity to DEX.

CYBEX GATEWAY

Gateways channel multi-chain crypto assets to the Cybex blockchain. It issues redeemable IOUs as fungible and divisible assets on the Cybex blockchain.

DECENTRALIZED EXCHANGE

DEX is a wallet based accounts system with order book and match engine. It setup a decentralized marketplace for cryptoassets on blockchain.

JADEPOOL

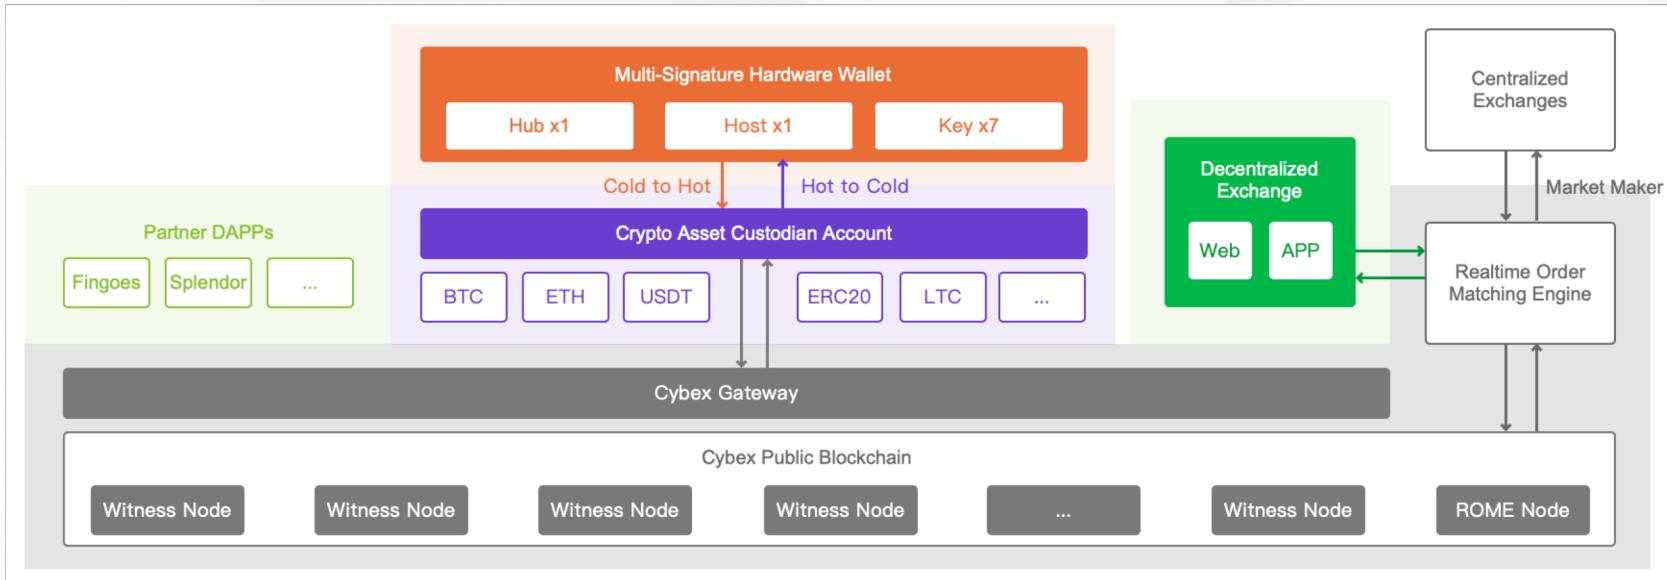

Jadepool, as a hot wallet, is developed with custodian security to automatically deposit and withdrawal of multi-chain crypto currency

WOOKONG (Enterprise Version)

Wookong, as a cold wallet, implements hardware multi-signature capability with secret sharing cryptography algorithm.

Ecosystem Architecture

Decentralized Financial Infrastructure Solution

02

Partners Program Overview

Round out your portfolio of products, solutions and services to enter the Cybex ecosystem of opportunity.

Explore the Function Units

Decentralized Financial Infrastructure Solution

WITNESS NODE

The witnesses' job is to collect transactions, bundle them into a block, sign the block and broadcast it to the network.

DECENTRALIZED EXCHANGE

DEX comes with a very particular set of advantages such as the global unified order book and the provable order matching algorithm.

DAPP DEVELOPER

Cybex provides better quality services at a fraction of the cost whether the business area is lottery, auction, ticket or many others.

REFERRED PROGRAM

Every Cybex lifetime member can get a cut of the fees based on sub-accounts linked to ours via referral.

BUDGET ITEMS

Network contributors can get payment for their budget items from the Cybex non-liquid reserve pool.

Services for Partners

Decentralized Financial Infrastructure Solution

SOFTWARE CATALOG

Start expanding your business through distributed software solutions with Cybex's administrator management system.

EDUCATION & TRAINING

Wikis, demos, and personalized courses for the developer community will help you to reduce the education costs and will aid in the access of the full inventory of Cybex products and technologies.

ADVOCACY & SUPPORT

Have all of your questions on any aspect answered by telephone, live chat and email. Promote your client solution built on Cybex products or technologies to other business partners.

03

Benefits and Rewards

As you advance in the partner program, the value of benefits increase to match your cooperation, portfolio, and expertise.

Partners Program Benefits

Decentralized Financial Infrastructure Solution

BECOME A CYBEX GATEWAY

The most straightforward method is by charging transaction fees every time someone moves value through your service. Gateway can also make money by charging users a fee every time they move one of its assets on the Cybex network and from market fees.

RUN A WITNESS NODE

For each successfully constructed block, a witness node is paid in shares that are taken from the limited reserves pool at a rate that is defined by the shareholders by means of unanimous vote.

DEVELOP CYBEX DAPPS

For businesses, the Cybex network can be used to issue their own token and let customers trade their shares either against predefined assets, or freely against any other asset. Merchants make use of the currency-denominated assets. Similar to traditional payment solutions, they let their customers pay using stable blockchain assets.

JOIN IN REFERRAL PROGRAM

The referral fees are controlled by the blockchain and are distributed like this: 20% go to the network and 80% go to the referral program; of this 80%, 30% go to the lifetime referrer and 50% go to the registrar; of this 50%, the registrar sets the percentage that will go to the affiliate referrer.

Value Package – Witness Node

Decentralized Financial Infrastructure Solution

“

IF YOU HAVE
HARDWARE
EQUIPMENTS AND
WANT TO RUN A
WITNESS NODE.

The witness node owner can entrust the operation and maintenance to Cybex afterwards, the owner earns the returns which are paid by the Cybex network as a block producer.

Software portfolio

- Cybex witness node code

Cost of partner

- Hardware equipment

Income of partner

- Witness node shares

Annual Revenue Estimation – Witness Node

Decentralized Financial Infrastructure Solution

	Items	Description	
INCOME	Witness Node Shares	Mining as a Cybex witness node	US\$ 15,000.00
COST	Hardware Equipment	(Alibaba Cloud or AWS) CPU: 4 core Memory: 32G Hard disk: 500G or above	US\$ 5,000.00
